Colloids and Surfaces A: Physicochemical and Engineering Aspects, 78 (1993) 282–283
Elsevier Science Publishers B.V., Amsterdam

Contents

(Abstracted/indexed in: Chemical Abstracts; Current Contents; Physical, Chemical & Earth Sciences; INSPEC; PASCAL/CNRS)

Vol. 78

Review

Acid–base interfacial interactions in aqueous media
C.J. van Oss (Buffalo, NY, USA) 1

Studies on the surface structure of *tert*-butyl alcohol–water mixtures
P. Dynarowicz (Kraków, Poland) 51

^{2}H NMR and the sol–gel transition in suspensions of colloidal clays
J.A. Ripmeester, L.S. Kotlyar and B.D. Sparks (Ottawa, Ont., Canada) 57

Granular activated carbon: importance of surface properties in the adsorption of naturally occurring organics
G. Newcombe (Salisbury, S.A., Australia), R. Hayes (Ingle Farm, S.A., Australia) and M. Drikas (Salisbury, S.A., Australia) 65

Electron spin resonance study of radicals formed during photo-oxidation of phenol on TiO_2
J. Soria and M.J. López-Muñoz (Madrid, Spain), V. Augugliaro (Palermo, Italy) and J.C. Conesa (Madrid, Spain) 73

Experimental study of thermodiffusiophoresis of growing dioctyl phthalate droplets
J. Smolik and J. Vašáková (Prague, Czech Republic) 85

Synergistic effects between cationic surfactants and organic pollutants on clay minerals
E. Klumpp, H. Heitmann and M.J. Schwuger (Jülich, Germany) 93

On the determination of kinetic parameters of sol formation by rheological measurements
W. Vogelsberger, J. Opfermann, U. Wank, H. Schulze and G. Rudakoff (Jena, Germany) 99

Applicability of Gibbs' law to protein adsorption isotherms
R. Douillard, J. Lefebvre and V. Tran (Nantes, France) 109

Characterization of a submicron-sized oil-in-water emulsion
K. Westesen (Braunschweig, Germany) and T. Wehler (Stockholm, Sweden) 115

Particle size determination of a submicron-sized emulsion
K. Westesen (Braunschweig, Germany) and T. Wehler (Stockholm, Sweden) 125

Testing protein adsorption models by off-null ellipsometry: determination of binding constants from a single adsorption curve
H.A.M. Andree, W.Th. Hermens and G.M. Willems (Maastricht, The Netherlands) 133

Characterization of surface active sites of catalysts with high-resolution solid-state NMR
V.M. Mastikhin (Novosibirsk, Russian Federation) 143

Effect of frequency on a water-activated electrorheological fluid in an a.c. electric field
T.Y. Chen and P.F. Luckham (London, UK) 167

The dependence of the orientation of liquid crystals on solid surfaces with constant surface topography on the surface tension
A. Seeboth, L. Richter and J. Schulze (Berlin, Germany) 177

ESR and ENDOR of Cu^{2+} in Nafion solutions and in reconstituted membranes
S. Schlick, G. Gebel, M. Pineri, G. Rius and F. Volino (Grenoble, France) 181

Dispersion–polar surface free energies of polypeptide films
A. Shibata, R. Tsukamoto, T. Ueoka, S. Ueno and T. Yamashita (Tokushima, Japan) 189

Static and dynamic adsorption of a non-ionic surfactant on Berea sandstone
W. Kwok, H.A. Nasr-El-Din, R.E. Hayes and D. Sethi (Calgary, Alta., Canada) 193

Monolayer characteristics of bacterial photosynthetic reaction centers
S.Yu. Zaitsev, N.A. Kalabina and V.P. Zubov (Moscow, Russian Federation), G. Chumanov, D. Gaul and T.M. Cotton (Ames, IA, USA) 211

Multilayer foam films and foams from surfactant solutions with high solubilizing ability
Khr. Khristov and D. Exerowa (Sofia, Bulgaria) and P.M. Kruglyakov (Penza, Russian Federation) 221
A constant composition kinetics study of the influence of salivary cystatins, statherin, amylase and human serum albumin on hydroxyapatite dissolution
K.O.A. Chin, M. Johnsson, E.J. Bergey, M.J. Levine and G.H. Nancollas (Buffalo, NY, USA) 229
Zeta potential modification of ceramic powders using zirconium hydrogel
T.E. Petroff, M. Sayer and S.A.M. Hesp (Kingston, Ont., Canada) 235
Transformation behaviour of calcium phosphate. 1. Theory and modelling
A.T.-C. Wong and J.T. Czernuszka (Oxford, UK) 245
Distribution of surfactants in latex films
E. Kientz and Y. Holl (Strasbourg, France) 255

Brief Notes
NMR studies of the interactions of neutral polymers with unilamellar vesicles
R. Labonté, Z. Gao and J.C.T. Kwak (Halifax, N.S., Canada) 271
Contact angles on particles from Langmuir trough studies
J.H. Clint and N. Quirke (Sunbury-on-Thames, UK) 277
